

TRẦN XUÂN BẮC

BACKEND .NET DEVELOPER | SYSTEM ANALYST

Gia Binh, Bac Ninh, Vietnam · Bxuan964@gmail.com · [View Portfolio](#) · [View GitHub](#)

CAREER OBJECTIVE

Seeking to apply my academic knowledge to real business processes and projects while strengthening my skills in software development, databases, and systems analysis. Aiming to contribute effectively to company projects and grow into a professional with strong technical expertise.

EDUCATION

Dai Nam University

Bachelor of Information Technology – Specialization in Information Systems (in progress)

Hanoi, Vietnam

2023 – Present

Relevant Coursework: Systems Analysis & Design, Databases, Web Programming, Software Engineering.

English: Able to read and understand technical documentation

WORK EXPERIENCE

HACOM HOLDING INVESTMENT JOINT STOCK COMPANY

Software Developer Intern – HRM Frontend

3 months

- Contributed to developing and enhancing the **HRM** system interface using React, TypeScript, and Vite.
- Built and improved **Dashboard, Attendance, Timesheet, and Work Shift** screens and shared components.
- Improved UI/UX, responsive layouts, and interface consistency based on project requirements.
- Used **Git/GitHub** for source control, merging changes, fixing bugs, and collaborating on module development.

TECHNICAL SKILLS

Languages:

C#, Python, JavaScript, SQL, HTML/CSS

Backend:

ASP.NET Core MVC/Web API, Entity Framework Core, RESTful API, ASP.NET Core Identity

Databases:

SQL Server, PostgreSQL, MySQL, SQLite

Tools:

Git/GitHub, Docker/Docker Compose, Postman

PROJECTS

WebBanHangOnline - Fashion E-commerce Website | Personal Project

2026

[GitHub: github.com/trxuanbac/WebBanHangOnline](https://github.com/trxuanbac/WebBanHangOnline)

- Built a fashion e-commerce system using ASP.NET Core MVC, Entity Framework Core, SQL Server, Bootstrap, and jQuery.
- Developed product, category, variant, inventory, cart, wishlist, review, and order management; implemented admin and customer workflows with ASP.NET Core Identity.
- Developed REST APIs, payment workflows (COD, VNPay, MoMo, VietQR), real-time chat with SignalR, and a Gemini-powered product consultation chatbot.
- Analyzed requirements and prepared system documentation, including BRD, SRS, Use Cases, ERD, API specifications, OpenAPI/Swagger documentation, Postman collections, and API test cases.
- Containerized the application and SQL Server with Docker Compose; prepared sample data for local deployment and testing.

Scant Reports - Data Upload and Report Export Web App | Personal Project

2026

[GitHub: github.com/trxuanbac/scant](https://github.com/trxuanbac/scant)

- Developed a web app supporting registration, login, CSV/XLSX uploads, data processing, and report generation.
- Implemented admin and user roles, account management, password reset, audit logs, health checks, and backup/restore functionality; prepared deployment documentation.
- Supported exports to HTML, summary CSV, DOCX, and PDF, with customizable HTML/Word report templates.
- Packaged the application with Docker and added unit tests to reduce maintenance risks.

Student Performance - Data Mining

2026

[GitHub: github.com/trxuanbac/student_performance](https://github.com/trxuanbac/student_performance)

- Processed the Student Performance dataset using Python, pandas, scikit-learn, mlxtend, matplotlib, and seaborn.
- Performed data cleaning, exploratory data analysis (EDA), categorical encoding, feature scaling, stratified train/test splitting, Apriori association rule mining, and KMeans clustering.
- Built and evaluated classification models including Logistic Regression, Decision Tree, Random Forest, and LabelPropagation.
