API TESTING INTERN

Gia Binh, Bắc Ninh · Bxuan964@gmail.com · Portfolio · GitHub

CAREER OBJECTIVE

Information Technology student pursuing an API Testing / QA internship, with hands-on experience in RESTful API testing, Postman test scripts & collections, Swagger/OpenAPI specifications, database validation (SQL Server), and backend integration. Seeking to ensure software quality, API reliability, and test automation in real-world projects.

TECHNICAL SKILLS

API & QA Testing:	RESTful API Testing, Postman (Collections, Tests, Variables, Scripts), Swagger/OpenAPI, Test Cases, Payload Validation
Database & Validation:	SQL Server, PostgreSQL, MySQL, SQLite, Data Verification Queries, Schema Validation
Backend Knowledge:	ASP.NET Core Web API, Identity (JWT/Cookie Auth), Webhook simulation, SignalR
Languages & Scripting:	JavaScript (Postman test scripts), SQL, C#, Python
Tools & DevOps:	Docker, Docker Compose, Git, GitHub, Swagger UI, Postman Newman

PROJECTS

WebBanHangOnline - Online Fashion E-commerce Website (ASP.NET Core) 2026

GitHub: <https://github.com/trxuanbac/WebBanHangOnline.git>

- Designed comprehensive Postman test collections with automated test scripts validating HTTP status codes, response times, headers, and JSON schemas.
- Conducted functional and boundary testing across 20+ API endpoints: authentication, product catalog, cart, orders, and admin analytics.
- Tested payment gateway webhooks (VNPAY, MoMo, VietQR) simulating callback payloads, checksum validations, and edge-case failure responses.
- Executed SQL Server database validation queries after API transactions to verify data consistency, inventory deductions, and order state updates.
- Authored OpenAPI/Swagger specifications and prepared structured test documentation, test suites, and Dockerized test environments.

Scant Reports - Data Ingestion and Multi-format Report Export System 2026

GitHub: <https://github.com/trxuanbac/scant.git>

- Validated file upload endpoints (CSV/XLSX) testing boundary conditions, file size limits, MIME type validation, and malformed file handling.
- Tested authentication, session management, role-based access control (Admin/User), password reset workflows, and audit log tracking.
- Verified exported data accuracy across HTML, CSV, DOCX, and PDF formats against raw dataset inputs; executed regression tests in Docker.

Student Management System - Testing & Validation Course Project 2024

GitHub: <https://github.com/trxuanbac/PROFILEE>

- Designed test cases and executed SQL queries to validate student enrollment, grade calculations, and database integrity constraints.

EDUCATION & CERTIFICATION

Dai Nam University - Bachelor of Information Technology

Hanoi, Vietnam | 2023 - 2026

English: Technical documentation reading proficiency
